

9000 Series Overhead Door Closer

OVERHEAD DOOR CLOSERS WITH COVER & MATCHING ADJUSTABLE ARM

The Exidor 9000 overhead door closer range offers a choice of two closers, each available with either a radius or square cover, all with the unique high efficiency cam and roller action making them suitable where the Equality Act is a consideration. The selectable power size 3/4 offers the option of backcheck, whereas the adjustable power size 2-5 has a choice of standard, backcheck, delayed action or backcheck with delayed action. Alternatively there is the selectable power size 2/3/4 which offers magnetic hold open. The magnetic hold open is activated at any angle above 70° up to a maximum of 165°, and the door simply stays in position. The hold open is disengaged by a slight pull on the door.

All closers are supplied as standard with a matching adjustable arm, and there is also the option of having a hold open arm. All Exidor closers come with universal fitting and are supplied with brackets for fig 1, fig 61 and fig 66 fixing.
